AMENDMENTS

Listing of the Claims:

1. (Currently Amended) A method of coordinating slotted multiple access in a wireless network channel shared by a plurality of users comprising the steps of:
 - a. assigning each of a plurality of users into a subgroup, thereby forming one or more subgroups of users, wherein each subgroup utilizes a contention mode;
 - b. utilizing a polling mode to provide each subgroup a transmission opportunity;
and
 - c. utilizing a seamless transition between the polling and contention modes such that when a specific subgroup is provided a transmission opportunity and a collision occurs between user signals within the specific subgroup, the specific subgroup is split into smaller subgroups, each smaller subgroup including a portion of the users within the specific subgroup and each smaller subgroup utilizes a contention mode.
